THE ARIZONA ENTERPRISE ZONE PROGRAM OVERVIEW

Background

The Arizona Enterprise Zone program was enacted in 1989 (A.R.S. § 41-1521 et seq.) and revised in several subsequent legislative sessions. The primary goal of the enterprise zone program is to improve the economies of areas in the state with high poverty or unemployment rates. The program does this by enhancing opportunities for private investment in areas eligible for zone status. The program provides income/premium tax credits for non-retail businesses creating new jobs in zones and property reclassification for small manufacturers investing in a zone. Enterprise zones are designated for a period of up to five years by the Arizona Department of Commerce. A statement of program benefits is attached as Page 4.

The first zones were designated under the program in 1990 and the first tax credits taken. In 1993, property tax benefits were added to the program. In 1996, the program was revised to encourage the creation of quality jobs that paid a state-designated wage and for which employers paid 50% of health insurance costs. In 1998, the program was extended for three years. In 1999, legislation was passed to allow insurers to use credits to offset premium taxes. In 2001, the program was again extended, the investment threshold for small manufacturers in rural Arizona was lowered and qualified companies were allowed to conduct up to 10% retail activity at the zone location. H.B. 2181 was passed in 2002 to strengthen the program's administrative procedures and help target the program more closely toward its purpose as an economic development tax incentive. The key provisions were: establishment of a time limit during which tax credits must be reported; limitation of credits to 200 first year credits per taxpayer in any given tax year; clarification of the types of allowable retail; prohibition of property tax benefits for producers of electricity; and, the strengthening of application and reporting requirements. In the 2004 legislative session, a bill was passed to refine the retail provision and to clarify that continuing credits could be claimed on amended returns for tax years 2000 and 2001. To correct a 2004 drafting error, the 2005 legislature enacted a technical correction dealing with amended returns.

Reporting Requirements

A.R.S. § 41-1527 provides that the Department submit an annual report to the Governor, the president of the Senate, the speaker of the House of Representatives and the chairpersons of the Senate finance committee and the House of Representatives ways and means committee or their successor committees, and shall provide a copy of this report to the Secretary of State and the Director of the Arizona State Library, archives & public records. The statute requires inclusion of the following material, which can be found as indicated:

Zone Designation

The number, size and location of all enterprise zones designated during the fiscal year – Pages 5 through 7.

Income and Premium Tax Credits

1. The amount of capital investment made by reporting companies made at the zone during the fiscal year- Page 8 through 9.
2. The businesses, locations, number of employees and amount of compensation paid to employees on whom tax credits were reported to the Department – Pages 10 through 27.

Property Reclassification Manufacturers

1. The number of minority-owned businesses, woman-owned businesses and small manufacturing businesses in each zone certified for property tax incentives during the fiscal year – Page 28 through 30.
2. For each certified manufacturer the name and location, the number of employees and the full cash value of the property qualifying for classification as class six pursuant to A.R.S. § 42-12006 – Pages 31 through 32.

STATEMENT OF PROGRAM BENEFITS

The primary goal of the Arizona enterprise zone program is to improve the economies of areas in the state with high poverty or unemployment rates. The program does this by enhancing opportunities for private investment in certain areas that are called enterprise zones. Enterprise zones are designated by the Arizona Department of Commerce.

Increased investments in such areas tend to strengthen property values (or keep property values from falling), and encourage job creation to promote the vitality of the local economies. ***Following is a brief summary of the two state benefits provided by the enterprise zone program.***

Income or Premium Tax Credits

Arizona statutes provide for an income and premium tax credit for ***net increases in qualified employment positions*** at a site located in an enterprise zone—except for those at a business location where more than 10% of the activity is the sale of tangible personal property at retail. Three types of retail are unlimited and may constitute any percentage of the business activity without causing ineligibility:

- a) Food and beverage for consumption on the premises solely by employees and occasional guests of employees at the location
- b) Promotional products displaying the company logo or trademark
- c) Products sold to company employees

Tax credits may total up to \$3,000 per qualified employment position over three years for a maximum of 200 employees in any given tax year. A qualified employment position:

- Is a full-time permanent job (1750 hours per year),
- Pays an hourly wage above the “Wage Offer by County” (currently between \$7.30 and \$11.77 depending on the county in which the business is located), and
- Offers health insurance to employees for which the employer pays at least 50 percent.

The enterprise zone credits for qualified employment positions are equal to:

- | | |
|---------------------|---|
| <u>First year:</u> | one-fourth of wages paid to an employee up to \$500 |
| <u>Second year:</u> | one-third of wages paid to each previously qualified employee up to \$1,000 |
| <u>Third year:</u> | one-half of wages paid to each previously qualified employee up to \$1,500 |

35% of the net new eligible employees on whom the business is claiming a credit must live within an enterprise zone in the same county as the business on the date of hire. If the allowable enterprise zone credit exceeds the income or premium tax liability, any unused amount may be carried forward for up to five taxable years, providing the business remains in the enterprise zone.

The law requires EZ Income/Premium Tax Reports be filed with the Arizona Department of Commerce by the earlier of ***either*** six months after the end of the tax year in which the credits were earned and claimed or by the date the tax return is filed for the tax year in which the credits were earned and claimed. Failure to timely report and certify to the Arizona Department of Commerce disqualifies the taxpayer from the tax credit.

Property Tax Benefits

Property reclassification is available for ***qualified manufacturing businesses in an enterprise zone***. A manufacturer in an Enterprise Zone is eligible for an assessment ratio of 5 percent on all personal and real property (for primary tax purposes only) in the zone for five years if it is:

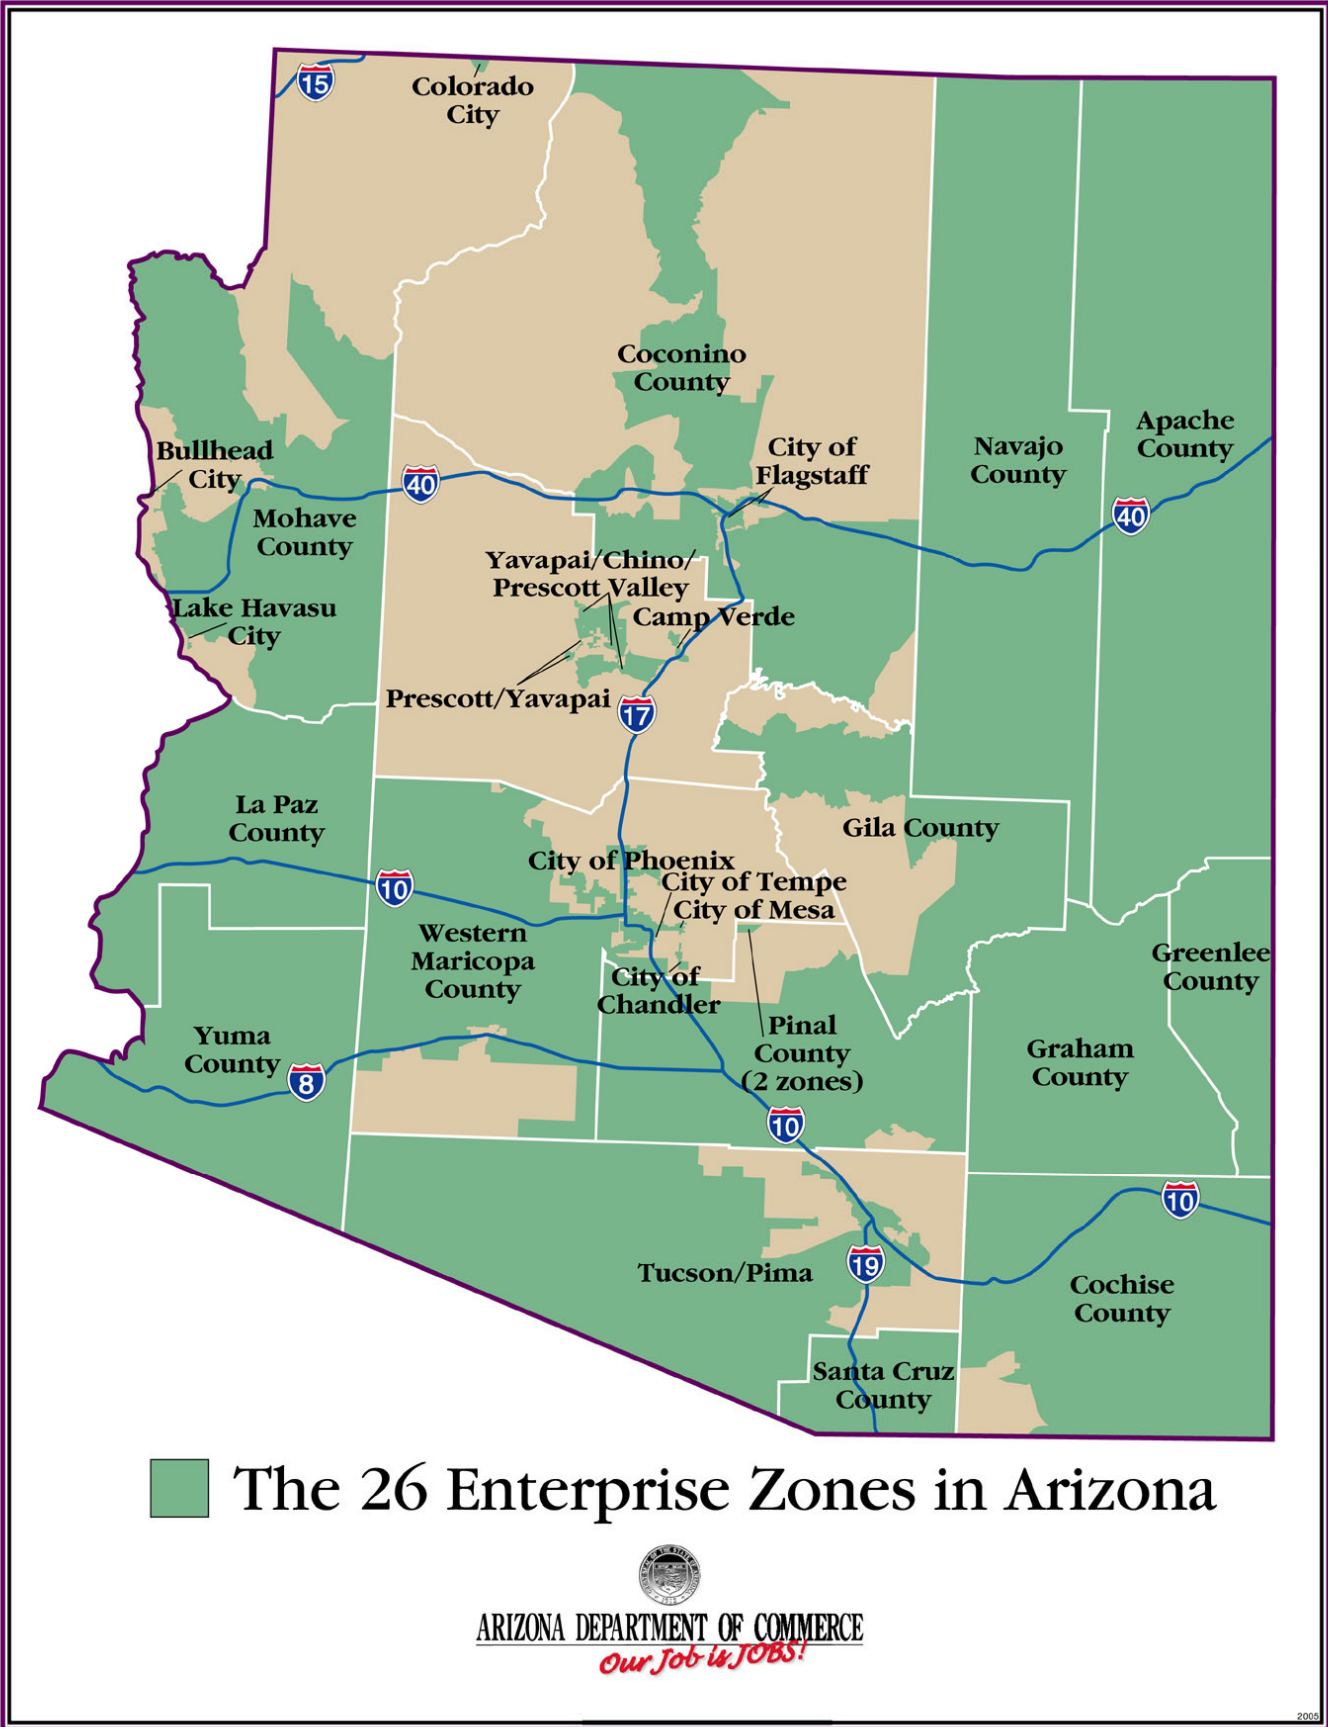

- Either minority-owned, woman-owned or small (a small business has 100 or fewer employees or gross sales of \$4 million or less), and
- Independently owned and operated (not owned more than 50 percent by another company)
- Makes an investment in fixed assets at the zone between \$500,000, \$1 million or \$2 million, depending upon the location of the facility. The investment can be aggregated from 1/1/1996 as long as the zone was in place during that time.

The law requires EZ Property Reclassification Reports to be filed with the Arizona Department of Commerce by October 1st of each calendar year to be eligible for reclassification in the next valuation year. For manufacturers already certified failure to timely report will result in loss of the property tax benefit. For new manufacturers the benefit will be delayed until the next valuation year.

The definition of manufacturing is set forth in the statute:

“Manufacturing means fabricating, producing or manufacturing products, wares or articles for use from raw or prepared materials, imparting to those materials new forms, qualities, properties and combinations.
Manufacturing does not include generating electricity at a facility assessed..”

REPORTED TAX CREDIT AGGREGATED BY ZONE
FY 2005

Many of the companies who reported in FY2005 have several business locations in different zones. Therefore, a total of 204 companies reported \$8,586,635 in tax credits at 359 business locations. With a combined investment of \$734 million, these companies created 5,627 new jobs with an average wage of \$16.58 per hour for the State of Arizona. These companies also reported 2,873 continuing second year jobs and 1,944 continuing third year jobs.
